## EASY-IN SYSTEM

### IDEAS BECOME REALITY

The SOLARWATT Easy-In System is a weatherproof alternative to conventional roof tiling. It's both a high-performance solar power system and a new roof that will refinance itself in one. Simple installation, excellent optical properties, and trusted SOLARWATT quality make the SOLARWATT Easy-In System unbeatable. SOLARWATT Quality.

The SOLARWATT Easy-In System is designed for slanted roofs and is built with standard SOLARWATT Easy-In M or SOLARWATT Easy-In Black modules.

The modules come as an installation-ready system, complete with all mounting materials including enclosure frames.

With just one tool and hardly any material costs, you'll have weatherproof roofing that is well-ventilated from the rear in an amazingly short amount of time.

#### The Advantages:

- » Ideal for roof replacement and new construction projects
- » Modules replace roofing tiles: they're directly attached to the roof battens
- » No additional mounting system is required: the module frames are all you need
- » The small number of individual components makes for less work during installation
- » Easy installation: the modules are hung onto the roof battens and fitted together with tongue-and-groove joints.
- » High power yields thanks to excellent rear ventilation
- » Quality-certified modules
- » A secure investment with attractive returns for years to come
